

# SHELTER IN ALL LOCATIONS

## **QUICK SHELTERING WITHOUT MACHINERY OR SCAFFOLDING IN CHANGING CONDITIONS**

KT-Shelter has been designed in cooperation with the Finnish Defence Forces. A patented innovation enables assembling the shelter from the ground up without machinery or scaffolding. The weather shelter is excellently suited for the year-round protection of aircraft and other defence equipment or quick-changing camouflage needs, regardless of the location. KT-Shelter can be camouflaged or equipped with a ballistic protection. The shelter is also well-suited for sheltering people, as it can be insulated, heated up, cooled down and subdivided, as needed.

# UNIQUE PROPERTIES

**KT-SHELTER** is delivered in four 20' shipping containers that contain the frame, a PVC fabric and the anchoring system. The delivery also contains all the necessary tools and instructions.

The frame is assembled from the ground up with pulleys. The Keder edge-reinforced fabrics and beams are installed stage-by-stage on the frame with the arcs lifted up by using a pull-on cradle system and then fixed solidly into the fastening grooves in the profile's top and bottom surfaces. The same fastening grooves can be used for attaching the accessories.

The primary model of the shelter is a semi-circular shaped-door mechanism that opens upwards. Alternatively, it is also possible to install a straight fabric door that contains slide rails for a door curtain. In both models, the ends are totally open. In windy climates, the shaped door is obligatory. The modular shelter can be extended with additional arcs.

## SELECT THE ACCESSORIES YOU NEED

Contact us and we can design a package that meets your requirements together. The accessories below can be included flexibly in the deliveries.

- A ballistic protection
- Camouflage
- A service crane 1,000 kg
- Lighting
- An inner liner
- Thermal insulation
- Interior heater
- Divider curtains
- A generator
- 2nd-floor structures
- Side doors
- Porches

**Maintenance  
& training**

**WE PROVIDE TRAINING SERVICES** to guarantee the optimal performance of the product. If you need specialist services or training concerning the use or maintenance of the product, please contact us by phone or email. **WE SERVE YOU** through the entire life cycle of the product as a close cooperation partner. We are just a phone call away, at all times of day and night around the year.

# CONTACT AND SERVICES

We would be pleased to discuss further the properties of KT-Shelter and your sheltering needs.
